

Samsung Insight, the latest business analytics software from Samsung, is available to order from 1st April. Full pricing will be published in the April price book.

What is Samsung Insight?

Samsung Insight is a business productivity tool that monitors inbound and outbound calls to help businesses understand their communications and manage customer-facing teams:

- **Key business metrics can be accessed via a web browser** on any computer or mobile device
- **Intuitive dashboards and wallboards** deliver **powerful call data visualisation** via a browser interface
- **Lightweight and easy to deploy**
- **Seamlessly upgrade to other modules in the suite** for call recording, real-time wallboards and dashboards which show live calls queuing analytics and user presence.

Please visit samsungpartnergateway.com for more information and to download the latest product datasheets.

To find out more sign up for the Samsung Insight overview webinar on Tuesday 14th April at 10am where you will find out:

- An overview of Samsung Insight modules
- Features and benefits
- Product demo
- Samsung Insight USPs
- Why choose Samsung Insight?
- Why sell Samsung Insight?
